High Light:	Glossy Lamination Corrugated Paper Box , E Flute Corrugated Paper Box , Recycled Laminated Corrugated Paper Box		

### Product Description

#### Custom Gloss Laminate Virgin Kraft Corrugated Paper Square Box

#### Corrugated Boxes

These eco-friendly corrugated boxes are the most commonly used in the market. Corrugated boxes have four flaps on the top and bottom end. When you do not have to use these boxes or they have to be shipped from one place to another, then they can be folded completely and efficiently. To recompile them all, you need to do is close the flaps on end and secure them with masking tape. This way, the box forms a shape and becomes legible to hold any item inside. Fold the top four tabs after the filling of the box to secure the things. The shape of these boxes can differ from one style to another, depending on the article that needs to be shipped, carried, or stored. Boxes are made of thick material and big. Boxes' thick material maintains their shape and prevents destruction. Sometimes these boxes can be equipped with handles on either side of the box for an easy commute.

#### Customization Process of Corrugated Boxes

The excellent quality of the material used for the production of these corrugated cardboard cases makes them easy to personalize. As these boxes can be used to contain the gifts, clothes, crockery, cooked food, stationery, and many other items, it demands to be presented uniquely. The way they are produced depends on the way they are to be used in the future. This is why the use of personalization becomes a good way to make them stand out in the market that is flowing with similar products. The use of laminations, spot UV technique, foiling, embossing and die-cutting make it possible for the customers to get creative in their production process. If you want to let the item on the inside be displayed without exposing the complete article, then it is possible to have the box window-cut. The PVC packaging technique makes a good option for marketing the product in a more effective way. Corrugated cardboard boxes can become customized packaging with their style, shape or design, etc. We use the latest coloring techniques and printing technologies to increase the quality of the box design. CMYK and PMS for coloring along with digital and screen technology for printing are implemented in the processing.

#### Product parameter:
