What is Folding Carton Box?

Folding carton boxes, also known as custom product boxes, are paperboard boxes primarily used for packaging individual products (e.g. perfume, candles, beauty products). These boxes usually have **tuck flaps** on one or both ends of the box, and can be corrugated for storing fragile or heavier products (check out other corrugated box types here). Folding cartons can be **fully customized** with print on the outside and inside of the box, giving you the best storyboard to share your brand.

The folding carton created the packaging industry as it is known today, beginning in the late 19th century. The process involves folding carton made of paperboard that is printed, laminated, cut, then folded and glued. The cartons are shipped flat to a packager, which has its own machinery to fold the carton into its final shape as a container for a product. An example of such a carton is a cereal box.
