What is Corrugated boxes

Corrugated boxes are made of fluted paperboard sandwiched between two flat liners. They are lightweight, durable, and customizable to various sizes and shapes. Widely used in shipping, storage, and retail industries, corrugated boxes provide cushioning and protection for the contents inside. Corrugated boxes have eco-friendly credentials, as they are produced from recycled materials and can be conveniently recycled once their use is over.

FAQ

1. What stock options are available for custom printed ecommerce packaging?

For boxes that are used for direct shipping and handling, we recommend using corrugated boxes.

Our corrugated boxes have a layer of coated cardstock on the outside for extra strength. The inside of corrugated boxes is typically either plain white or natural brown. Other color options are also available as needed.

2. Can corrugated boxes have full color printing on the outside and inside?

Yes, we can produce spot colors as well as a full color CMYK print on boxes made from corrugated stock.

These boxes can have full color printing on the inside also.

3. What size options are available for branded ecommerce packaging?

We can produce ecommerce packaging in any custom size to meet your specific requirements. Our sales team can help you explore various box types, size options, and provide a customized price quote along with specific design templates.

4. Which industries do you serve?

We have worked with clients from a wide variety of industries including:

[Cosmetics](#)
[Personal Care](#)
[CBD](#)
[Pharmaceutical](#)
[Home Decor and Candles](#)
[Candy and Confectionery](#)
[Beverage Distribution](#)
[Pet Care](#)

5. At what resolution should I save my photos and graphics?

Resolution should be set to at least 300 dpi (dot per inch). Please note that pictures and graphics pulled from the internet are often low resolution, typically 72 dpi or 96 dpi. Avoid these graphics, as they will appear pixelated and blocky when printed. In addition, all photos and images should be saved in CMYK mode (as opposed to RGB mode) when possible. Images saved in RGB mode will likely not print properly. If you are unable to save your image in CMYK mode, please let us know.
