What we can produce?

We can produce many different standard styles of corrugated boxes. In addition, we can also produce customized boxes to fit your specific requirements. Please send us the details and we will be happy to produce a free mockup for your review. Here is a list of some of the many different corrugated packaging that we can produce:

One Piece Mailers
 Pizza Style Boxes
 Display Boxes
 Kraft Corrugated Packaging
 Packaging Inserts
 Shipping Boxes

FAQ

1. What do the terms 3-ply corrugated stock and 5-ply corrugated stock refer to

3-ply corrugated stock has a sheet of flute glued in between two sheets of paperboard. This is also known as 'single wall corrugated stock' and is most commonly used for making cost-effective corrugated boxes and inserts. On the other hand, 5-ply corrugated stock has two sheets of flute alternatively layered between three sheets of linerboard. Also known as 'double wall corrugated stock', this version of corrugated stock is sturdier and specifically used for heavier products.

2. Are corrugated boxes always brown?

No, the inside as well as the outside of the corrugated boxes can be brown or white. You can also choose the boxes to be white on inside and brown on the outside and vice versa.

3. What styles or types of promotional packaging can YM Package produce?

We can produce many different standard styles of boxes. In addition, we can also produce customized boxes to fit your specific requirements. Here is a list of some of the many different box types that we can produce:

[One Piece Mailers](#)
[Auto Lock or Auto Bottom Boxes](#)
[Corrugated Boxes](#)
[Pillow Boxes](#)
[Tuck Boxes](#)
[Display Boxes](#)
[Chipboard Packaging](#)
[Product Sleeves and Belly Bands](#)

4. Which industries do you serve?

We have worked with clients from a wide variety of industries including:

[Cosmetics](#)
[Personal Care](#)
[CBD](#)
[Pharmaceutical](#)
[Home Decor and Candles](#)
[Candy and Confectionery](#)
[Beverage Distribution](#)
[Pet Care](#)
[Vape Products](#)

5. What resolution should I save my photos and graphics?

Resolution should be set to at least 300 dpi (dot per inch). Please note that pictures and graphics pulled from the internet are often low resolution, typically 72 dpi or 96 dpi. Avoid these graphics, as they will appear pixelated and blocky when printed. In addition, all photos and images should be saved in CMYK mode (as opposed to RGB mode) when possible. Images saved in RGB mode will likely not print properly. If you are unable to save your image in CMYK mode, please let us know.
